The Winvale Group to Participate in Annual NIST IT Security Automation Conference
Winvale will join Gideon Technologies in Baltimore's Inner Harbor for 5th Annual Event

Washington, DC ... The Winvale Group (Winvale), a government contracts consultancy and value-added reseller, announced that they will join Gideon Technologies at the 5th Annual NIST IT Security Automation Conference. The Conference will provide public and private sector executives, security managers and staff, Information Technology (IT) professionals, and developers of products and services with a common understanding for using specific open standards and new security technologies.

The Winvale Group is pleased to offer Gideon Technologies' SecureFusion under GSA's SmartBUY BPA program. The SecureFusion software suite from Gideon Technologies is the first fully SCAP-compatible compliance framework tool. SecureFusion integrates the discovery of assets, vulnerability management, configuration management and policy management in a single, easy to deploy, easy to manage package.

The 5th Annual NIST IT Security Automation Conference will take place October 27-29, 2009. To register, go to: https://www.fbcinc.com/nist_autosec/atreg1.aspx
